COMPANY OVERVIEW

Who We Are

Evergreen Garden Company is a family owned and operated landscaping business that has been shaping outdoor spaces across Northern and Southern California for over four decades. What began as a small, hands-on operation has grown into a trusted name for professional landscaping, known for combining old-fashioned craftsmanship with thoughtful, modern design. The company is led by owner Skip Hammond, who remains personally involved on nearly every job site, working alongside his crew rather than simply overseeing from a distance.

Unlike larger, impersonal outfits, Evergreen Garden Company operates with the accountability of a family business. Every homeowner who reaches out is treated as a long-term relationship rather than a single transaction, and that philosophy shows in the consistency of the finished work. The company holds an active Contractor's State License (#503488), giving clients the assurance that projects are handled by a properly licensed and insured landscape professional.

MISSION

What Drives the Business

The company's core purpose is simple: help homeowners fall in love with their outdoor space. Rather than offering cookie-cutter packages, Evergreen Garden Company positions itself as a full-service landscape partner, capable of taking a property from a bare, undeveloped yard all the way through to a finished, livable landscape. This includes everything from the earliest planning conversation and hand-drawn blueprint, to construction, planting, and the ongoing maintenance that keeps a landscape healthy for years afterward.

Because the team manages design and build in-house, clients avoid the common headache of coordinating between separate designers, contractors, and maintenance crews. One point of contact, one crew, and one continuous vision carry a project from concept to completion.

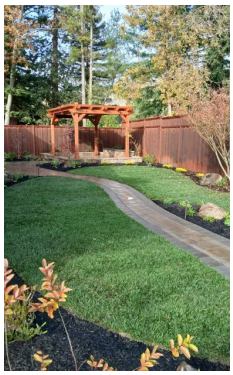
WHAT WE OFFER

Landscape Services & Solutions

Evergreen Garden Company provides a comprehensive menu of landscape services designed to cover every stage of an outdoor project. Whether a client needs a single repair, a new patio, or a full property transformation, the team approaches each request with the same attention to detail and the same commitment to durable, well-built results. The following are the primary landscape solutions the company is known for.

Landscape Design

Custom plans built around how a family actually uses its yard — factoring in sun exposure, drainage, plant compatibility, and the homeowner's personal style before a single shovel goes into the ground.



A designed backyard with a wood pergola, stone walkway, and manicured lawn.

Hardscape Installation

Patios, walkways, retaining walls, and paver work that give a property structure and durability, engineered to hold up against California's varied climate.

Softscape & Planting

Thoughtful plant selection, garden beds, and drought-tolerant landscaping that keeps a yard looking lush while remaining sensible about water use.

Custom Water Features

Ponds, waterfalls, and fountains built to be a landscape's centerpiece, designed and installed with the same craftsmanship as the rest of the property.

Artificial Turf

Low-maintenance, always-green turf solutions for families who want the look of a healthy lawn without the ongoing watering and mowing.

Low-maintenance artificial turf installed as a lush front-yard lawn.

Woodworking & Outdoor Structures

Custom decks, gazebos, trellises, and pergolas that extend a home's living space outdoors and add architectural character to the yard.

A custom pergola, paver patio, and container plantings by Evergreen Garden Company.

Garden Maintenance

Ongoing planting, pruning, and seasonal cleanups that keep a finished landscape healthy, vibrant, and looking its best all year round.

Because all of these landscape services are handled by one integrated team, a client's water feature, hardscape, and planting plan are always designed to work together visually and functionally — rather than being stitched together from separate vendors after the fact.

HOW A PROJECT COMES TOGETHER

The Evergreen Process

Evergreen Garden Company follows a consistent four-step process on every project, which helps keep expectations clear and timelines predictable from the very first phone call through to the final walkthrough.

1. Consultation

Every project starts with a conversation. The team visits the property, listens to the homeowner's goals and budget, and gets a feel for how the space will be used.

2. Design & Planning

The team creates a detailed landscape design and plan tailored specifically to that property, factoring in layout, materials, and the client's stated priorities.

3. Installation

Once the design is finalized, the skilled landscaping crew — led on-site by the owner — brings the plan to life, from grading and hardscape work through to final planting.

4. Maintenance

After installation, ongoing landscape maintenance keeps the new space looking its best throughout every season, protecting the investment for years to come.

DIFFERENTIATORS

Why Homeowners Choose Evergreen Garden Company

- 44 Years of Experience — Decades of hands-on work translate into proven techniques, trusted supplier relationships, and quality materials on every project, large or small.
- Family Owned Business — Honest communication and dependable service come naturally when the owner's name and reputation are attached to every yard the company touches.
- Owner On-Site — Skip Hammond works directly alongside his crew rather than simply managing from an office, which keeps quality consistent from the first shovel to the final cleanup.
- Full Bay Area Coverage — The company proudly serves homeowners throughout the San Francisco Bay Area, adapting its landscape solutions to the needs of each individual community and property.
- Licensed & Insured — Contractor's State License #503488 gives homeowners confidence and legal protection throughout the project.

CLIENT FEEDBACK

What Clients Are Saying

> *“Evergreen Garden Company covers all the bases — elegant stone retaining walls, custom waterfalls, pavers, gazebos, decks, trellises, and complete landscape design. So glad I found them.”*
>
> **— Don S., Concord, CA**

> *“Skip was great to work with. He responded to calls quickly, showed up early, and his rates were very reasonable. He even came back to inspect an issue afterward at no charge. We'll keep using his services.”*
>
> **— Teresa M., Antioch, CA**

> *“The job was professionally done from start to finish. We love our drought-tolerant garden, the new gate, and the concrete walkway and patio. An excellent job from a happy client.”*
>
> **— Maria D., Antioch, CA**

> *“We had about ten companies give estimates on our yard renovation. We chose Skip because he listened to our ideas, stayed within budget, and designed something better than we imagined.”*
>
> **— Cherry H., Concord, CA**

SERVICE AREA

Where Evergreen Garden Company Works

The company's landscape services extend across the San Francisco Bay Area, along with a broader history of projects throughout Northern and Southern California. Its 44-year presence in the region means the team understands local soil conditions, water restrictions, and climate patterns well enough to design landscapes that are built to last in this specific environment, not simply borrowed from a generic template.

Get In Touch

Evergreen Garden Company welcomes new inquiries from homeowners ready to begin planning their next outdoor project, from a small garden refresh to a complete backyard transformation.
